Resource Recovery Corporation/ Pasco Sanitary Landfill

SUMMARY OF COMMUNICATION

As you know, I sent Ecology a copy of the Dioxin Study at the Pasco Landfill. The study indicated that although there does not appear to be a problem with the migration of pesticides associated with dioxin, there has been a groundwater release of various organics.

Bob Kievit and Ecology responded with a variety of questions and comments, one of which was whether EPA has scored the site for the NPL based on this new data. To my knowledge we had not done so, therefore I asked Joan Shafer to review the new data and score the site. She said she could do so the week of August 18.
